Abstracts

The global Electric Parking Brake System market size is expected to reach \$ 26500 million by 2032, rising at a market growth of 11.0% CAGR during the forecast period (2026-2032).

Electric parking brake is a substitute of traditional handbrake. Electric parking brake eliminates the need for a parking brake lever or pedal and improves vehicle styling, space management and crashworthiness. It's a lot easier for automakers to design their interiors and to add new features and options.

Global Electric Parking Brake System key players include ZF TRW, Continental, K?ster, Dura, Mando, etc. Global top five manufacturers hold a share over 80%.

Europe is the largest market, with a share over 40%, followed by North America and China, both have a share over 30% percent.

In terms of product, Caliper Integrated EPB is the largest segment, with a share over 90%. And in terms of application, the largest application is Sedans, followed by SUVs.

This report studies the global Electric Parking Brake System production, demand, key manufacturers, and key regions.
