The global Electric Portable Moxibustion Instrument market size is expected to reach \$ 1388 million by 2032, rising at a market growth of 9.4% CAGR during the forecast period (2026-2032).

In 2025, global shipments of electric portable moxibustion instruments are estimated at approximately 19.8 million units, with an average selling price of about USD 72 per unit. Electric portable moxibustion instruments are compact therapeutic devices that use electricity as the heat source, employing electric heating elements, intelligent temperature control systems, and safety protection structures to replicate the thermal stimulation effects of traditional moxibustion. While preserving the core principles of warming meridians and promoting circulation, these devices eliminate open flames, smoke, and combustion residues. They offer stable temperature control, ease of use, reusability, and suitability for long-term home therapy, making them a key product form in the modernization and consumerization of traditional moxibustion therapy.

From a market perspective, electric portable moxibustion instruments have become the dominant technological route within the portable moxibustion category, with steadily increasing penetration in home healthcare and daily therapy consumption. Growing consumer emphasis on safety, convenience, and controllability gives electric products a clear advantage over traditional combustion-based tools. Industry trends point toward greater intelligence and multifunctional integration, including multi-level precision temperature control, timer management, modular therapy heads, and connectivity with mobile devices for health tracking. Design aesthetics, wearing comfort, and material safety are emerging as key differentiation factors. Market consensus suggests that electric portable moxibustion instruments, combining traditional therapy concepts with consumer electronics attributes, offer strong long-term growth potential, while competition will increasingly shift from price-driven to technology-, safety-, and brand-driven dynamics.
