Transmission of electric power is transfer of bulk electrical energy to substations from power generating plants. Electrical transmission is distinct from electrical distribution, in terms of carrying large quantities of high voltage power over large distances; thus there are differences in the equipment used for each. In this report, products demanded are transformers and switchgear and many other products.

SCOPE OF THE REPORT:

The global electric power transmission equipment industry mainly concentrates in United States, Europe, Japan, China and India. The global leading players in this market are ABB, Siemens, Schneider Electric and Hitachi, which accounts for 34.89% of total production value. In China the market leaders are China XD Group, TBEA and Shanghai Electric.

Despite the presence of competition problems, due to the electricity infrastructure investment plan of each country, Africa, India and some emerging markets still have great potential for growth in the future. Due to the clear global recovery trend, investors are still optimistic about this area, investors are still optimistic about this area, the future will still have more new investment enter the field.
