## Abstracts

According to our (Global Info Research) latest study, the global Electric Pressure Cooker market size was valued at US\$ 1619 million in 2024 and is forecast to a readjusted size of USD 2007 million by 2031 with a CAGR of 3.2% during review period.

This report studies the Electric Pressure Cooker market. Compared with traditional pressure cooker (invented in 1679), electric pressure cookers (invented in 1991) includes an electric heat source that is automatically regulated to maintain the operating pressure with a stand-out feature of convenient digital timing technology.

The global electric pressure cooker industry is highly concentrated, with the top five manufacturers accounting for about 75% of the market share. Major companies include Midea Group, Zhejiang Supor Co., Ltd., Joyoung Co., Ltd., Panasonic Holdings Corporation and Galanz Group. These manufacturers dominate the global market with their technological advantages, product innovation and wide market coverage. China, as the world's largest electric pressure cooker production region, contributes about 68% of the output, followed by South Korea and the United States, which account for 11% and 6% of the production share respectively.

In terms of regional market distribution, China is not only the largest producer, but also the largest consumer market, accounting for 39% of the global market share. North America and Europe follow closely, accounting for 26% and 9% of the market respectively. The growth of the North American market is mainly driven by consumers' demand for efficient and convenient cooking equipment, while the European market pays more attention to the energy-saving performance and safety of products, which drives the continued demand for electric pressure cookers in these two regions.

In terms of capacity, electric pressure cookers with a capacity greater than 5L account for about 64% of the market share, indicating that large-capacity electric pressure cookers are in great demand among home users, especially for families with a large population and frequent large-scale cooking scenarios. At the same time, electric pressure cookers with smaller capacity are more popular among singles or small families. This differentiated demand provides manufacturers with the opportunity to customize products to better meet the cooking needs of different consumers.

As global consumers' demand for smart home appliances increases, the electric pressure cooker market is expected to continue to grow. Intelligent functions such as remote control, voice control, and automatic pressure and temperature adjustment technologies are becoming an important direction for the development of the industry. In addition, consumers' attention to energy-saving and environmentally friendly products will also drive manufacturers to develop more energy-saving products. However, the challenges facing the market include fluctuations in raw material prices and intensified market competition. Manufacturers need to maintain market competitiveness through technological innovation and brand building.
