According to our (Global Info Research) latest study, the global Electric Propulsion Satellites market size was valued at USD 96 million in 2023 and is forecast to a readjusted size of USD 528.7 million by 2030 with a CAGR of 27.7% during review period.

Electric Propulsion (EP) is a class of space propulsion which makes use of electrical power to accelerate a propellant by different possible electrical and/or magnetic means. The use of electrical power enhances the propulsive performances of the EP thrusters compared with conventional chemical thrusters. Unlike chemical systems, electric propulsion requires very little mass to accelerate a spacecraft.

Europe is the largest Electric Propulsion Satellites market with about 40% market share. North America is follower, accounting for about 26% market share.The key manufacturers are ArianeGroup, Busek Co. Inc., SITAEL, Accion Systems Inc., HELMET etc. Top 3 companies occupied about 63% market share.

The Global Info Research report includes an overview of the development of the Electric Propulsion Satellites industry chain, the market status of Nano Satellite (Hall Effect Thruster (HET), Pulsed Plasma Thruster (PPT)), Microsatellite (Hall Effect Thruster (HET), Pulsed Plasma Thruster (PPT)), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Electric Propulsion Satellites.
