The global Electric Random Orbital Sander market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Electric random orbital sanders are ideal for quick sanding needs. A random orbital palm sander is a hand-held power tool which sands in a random-orbit action. That is, in constant irregular overlapping circles. You can use them to smooth surfaces such as rough metal, wood or plastic. They can be used to remove paint or rust. These sanders are best used on flat surfaces and should be held with even pressure across the face of the pad.
