## Abstracts

The global Electric Ranges market size is expected to reach \$ 14500 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032). An electric range is a kitchen cooking appliance powered primarily by electricity, typically combining electric cooktops and an electric oven to perform a variety of cooking functions such as boiling, frying, baking, and roasting. Electric ranges generate heat through resistive heating elements or electromagnetic induction, eliminating the need for gas supply. They offer advantages such as enhanced safety, precise temperature control, ease of installation, and cleaner operation, and are widely used in residential kitchens, apartments, and selected commercial foodservice applications as a key component of electrified kitchens.

The electric range market is driven by the accelerating electrification of residential energy use and the promotion of low-carbon lifestyles, as many regions encourage reducing household reliance on fossil fuels and shifting from gas to electricity. Rapid urbanization, the growing share of apartment living, and standardized kitchen layouts are also supporting demand for electric ranges due to their ease of installation and operation. In addition, rising consumer awareness of kitchen safety, cleanliness, and cooking convenience, together with technological advances such as induction heating, precise temperature control, and smart home connectivity, is strengthening the adoption of electric ranges, particularly in mid- to high-end appliance segments.

The industry is relatively concentration, the key brand include GE Appliances (Haier), Whirlpool, Electrolux, Fotile, Samsung, LG Electronics, Peerless Premier Appliance, Bosch, Sharp, Fisher & Paykel Appliances, Viking Range, Wolf Appliance, Danby Products Limited, Felix Storch and so on. GE Appliances (Haier) and Whirlpool are the top 2 players of Electric Ranges, with about 60% market shares.
