## Abstracts

Rolling shutter doors are connected in series with multi-joint movable door pieces. In a fixed slideway, the door rotates up and down with the reel above the door as the center. Roller shutters are usually widely used in shops. The rolling shutter door plays the role of horizontal separation like a wall. It consists of a curtain plate, a seat plate, a guide rail, a support, a reel, a box, a control box, a rolling door machine, a limiter, a door lintel, a manual quick release switch device, and a button switch. It is composed of multiple parts such as safety devices, etc., and is generally installed in parts that are inconvenient to be separated by walls.
