According to our (Global Info Research) latest study, the global Electric Vehicle Charger market size was valued at USD 5667.7 million in 2023 and is forecast to a readjusted size of USD 26590 million by 2030 with a CAGR of 24.7% during review period.

An electric vehicle charger, also called EV charging station, electric recharging point, charging point, charge point, ECS (electronic charging station), and EVSE (electric vehicle supply equipment), is an element in an infrastructure that supplies electric energy for the recharging of plug-in electric vehicles—including electric cars, neighborhood electric vehicles and plug-in hybrids.

For charging at home or work, some EVs have onboard converters that can plug into a standard electrical outlet or a high-capacity appliance outlet. Others either require or can use a charging station that provides electrical conversion, monitoring, or safety functionality. These stations are also needed when traveling, and many support faster charging at higher voltages and currents than are available from residential EVSEs. Public charging stations are typically on-street facilities provided by electric utility companies or located at retail shopping centers, restaurants and parking places, operated by a range of private companies.

Global 5 largest manufacturers of Electric Vehicle Charger are BYD, ABB, TELD, Chargepoint and Star Charge, which make up about 52%. Among them, BYD is the leader with about 22% market share.

Asia Pacific is the largest market, with a share about 58%, followed by Europe and North America, with share about 24% and 18%. In terms of product type, DC Charging

Pile occupy the largest share of the total market, about 55%. And in terms of product application, the largest application is Public Charging, followed by Residential Charging.
