The global Electric Solenoid Valve market size is expected to reach \$ 8096 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

In 2025, global sales volume of electric solenoid valves is estimated at approximately 320 million units, with an average selling price of around USD 18 per unit. An electric solenoid valve is a fundamental automation component that uses an electromagnetic coil to drive a valve core, enabling on/off control or directional regulation of fluids (gas or liquid). It typically consists of a coil assembly, valve body, plunger, spring, and sealing structure. These products are widely used in industrial automation systems, HVAC systems, automotive thermal management systems, medical devices, household appliances, and fluid control systems. Key performance indicators include response speed, sealing reliability, pressure resistance, media compatibility, and long-term switching durability. Different structural types—such as direct-acting, pilot-operated, and semi-direct acting—show significant differences in pressure range and flow control capability.

From a market structure perspective, electric solenoid valves represent a mature large-scale segment within basic industrial automation actuators. Demand is driven by industrial automation upgrades, increasing penetration of intelligent equipment, and the electrification trend in automotive and home appliance control systems. Applications are highly fragmented but relatively standardized, forming a typical long-tail market structure with broad downstream coverage but low unit value. Technical barriers are moderate, with competition mainly focused on product reliability lifespan, response consistency, sealing material durability, and large-scale manufacturing capability. In addition, industrial safety and automotive-grade certification requirements create entry barriers in higher-end segments. Overall, the industry is characterized by stable growth, high

standardization, strong economies of scale, and intense price competition.
