The global Electric Submeter market size is expected to reach \$ 12110 million by 2032, rising at a market growth of 3.6% CAGR during the forecast period (2026-2032).

Electric Submeter is usually an electronic device that records consumption of electric, water, gas, heat energy in intervals of an hour or less and communicates that information at least daily back to the utility for monitoring and billing. It enables two-way communication between the meter and the central system. Unlike home energy monitors, it can gather data for remote reporting.

Asia Pacific is the main market for electric submeters, accounting for about 55% of the market.

Sanxing, Longyang Electronics, Landis+Gyr, Itron and Wsunlight Group are the main players, with the top three accounting for about 20%.

This report studies the global Electric Submeter production, demand, key manufacturers, and key regions.
