Electric surfboard is a motorized surfboard that allows riders to propel themselves through the water using an electric motor instead of traditional paddling. The electric motor is typically powered by a rechargeable battery and controlled by a handheld wireless remote. E-surfboards are often designed with hydrofoils, which are underwater wings that lift the board out of the water at higher speeds, reducing drag and allowing for smoother and faster rides. Electric surfboards are becoming increasingly popular among water sports enthusiasts who want to experience the thrill of surfing in a new and exciting way.
