## Abstracts

Electric Vehicle Charger (EVC) is a device which converts the alternating current (AC) distributed by electric utilities to the direct current (DC) needed to recharge the battery of electric vehicle. There are a number of different types of battery chargers based on the way they control the charging rate and whether installed on the electric vehicles, such as on-board and off-board Electric Vehicle Charger (EVC). Generally, the former has a small power, while off-board is large and has power more than 30 KW.
