Abstracts

The global Electric Vehicle Charging Software market size is expected to reach $ 61700 million by 2029, rising at a market growth of 38.7% CAGR during the forecast period (2023-2029).

The development of electric vehicle charging stations for electric vehicles has gained significant momentum over the past decade. Adoption of charging station services for electric vehicles help in reducing the pollution in large population centers, increase customer loyalty, and attract new customers, thereby driving the market growth. The rapidly evolving electric vehicle (EV) market is driving innovation in EV technology and associated infrastructure. Electric vehicles offer multiple advantages such as reduced fuel consumption and decreased emissions from tailpipes, which significantly boost their demand across the globe. This in turn is expected to escalate the need for charging stations for electric vehicles, thereby driving the market growth. Charging stations are being rapidly developed as a part of government initiative programs and EV manufacturers are being involved in the development of charging spots in the parking locations. EV manufacturers are focusing on the establishment of charging stations for electric cars to enhance the sales of electric vehicles. EV Charging as a service at the workplace can be a crucial opportunity for EV drivers who do not have easy access to home charging stations. Workplaces are most likely to install fast chargers. Moreover, a rapidly growing need for EV Charging services in the commercial sector has emerged due to the increasing purchasing power & infrastructure in developing economies.

An Electric Vehicle Charging Software is a cloud-based software for the management, monetization, and operation of electric vehicle charge stations with real-time information for the monitoring and optimization of EV charging networks. EV charging platforms can enable specialized services and technologies for charging networks, with different

functions and modules being made available for home, workplace and public charging. Roaming, smart charging, EV fleet management, and payment solutions for charging sessions can provide businesses with a range of efficient and flexible technologies to maximize their operations.

This report studies the global Electric Vehicle Charging Software demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Electric Vehicle Charging Software, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Electric Vehicle Charging Software that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Electric Vehicle Charging Software total market, 2018-2029, (USD Million)

Global Electric Vehicle Charging Software total market by region & country, CAGR, 2018-2029, (USD Million)

U.S. VS China: Electric Vehicle Charging Software total market, key domestic companies and share, (USD Million)

Global Electric Vehicle Charging Software revenue by player and market share 2018-2023, (USD Million)

Global Electric Vehicle Charging Software total market by Type, CAGR, 2018-2029, (USD Million)

Global Electric Vehicle Charging Software total market by Application, CAGR, 2018-2029, (USD Million)

This reports profiles major players in the global Electric Vehicle Charging Software market based on the following parameters – company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Tesla, State Grid, TELD, Star Charge, EnBW, Shell, Elli, Allego and Chargepoint, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Electric Vehicle Charging Software market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2018-2029 by year with 2022 as the base year, 2023 as the estimate year, and 2024-2029 as the forecast year.

Key Questions Answered

1. How big is the global Electric Vehicle Charging Software market?

2. What is the demand of the global Electric Vehicle Charging Software market?

3. What is the year over year growth of the global Electric Vehicle Charging Software market?

4. What is the total value of the global Electric Vehicle Charging Software market?

5. Who are the major players in the global Electric Vehicle Charging Software market?

6. What are the growth factors driving the market demand?
