Electric vehicle sound generators are also referred to as acoustic vehicle alerting systems (AVAS). They are essentially devices generating sound and are fitted to hybrid, electric and plug-in hybrid vehicles to emit vehicle running sound at high and low speeds to warn cyclists, pedestrians, visually impaired individuals and other road users about vehicle presence.

Global EV sales continued strong. A total of 10,5 million new BEVs and PHEVs were delivered during 2022, an increase of +55 % compared to 2021. China and Europe emerged as the main drivers of strong growth in global EV sales. In 2022, the production and sales of new energy vehicles in China reach 7.0 million and 6.8 million respectively, a year-on-year increase of 96.9% and 93.4%, with a market share of 25.6%. The production and sales of new energy vehicles have ranked first in the world for eight consecutive years. Among them, the sales volume of pure electric vehicles was 5.365 million, a year-on-year increase of 81.6%. In 2022, sales of pure electric vehicles in Europe will increase by 29% year-on-year to 1.58 million.
