According to our (Global Info Research) latest study, the global Electric VTOL (eVTOL) Aircraft market size was valued at USD 12 million in 2023 and is forecast to a readjusted size of USD 14910 million by 2030 with a CAGR of 176.3% during review period.

EVTOL (electric vertical takeoff and landing) is a type of aircraft that uses electric power to hover, take off, and land vertically. This technology came about thanks to major advances in electric propulsion (motors, batteries, electronic controllers) and the growing need for new vehicles for urban air mobility (air taxi). Evtol is an electric aircraft that is distinguished by electrification, automated control and the possibility of vertical take-off and landing. Due to its efficiency, noiselessness and the fact that a small "patch" of ground is enough for vertical take-off and landing, Evtol craft can make flights a common form of movement of earthlings in space. The electric vtol (EVTOL) aircraft industry can be broken down into several segments, electric, hydrogen fuel cell, hybrid, etc. Across the world, the major players cover volocopter gmbH, beta technologies, embraer S.A., Lilium GmbH, Archer Aviation, Joby Aviation, Jaunt Air Mobility, Wisk, Airbus, Ehang, etc.

EHang is one of the world's most important electric vertical take-off and landing (eVTOL) aircraft manufacturers, with a market share of over 85%. Asia-Pacific is the largest market with about 90% share. In terms of type, all-electric is the largest market segment, with a market share of over 100%.
