The global Electrical Switches market size is expected to reach \$ 5326 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

In electrical engineering, an electrical switch is an electrical component that can 'make' or 'break' an electrical circuit, interrupting the current or diverting it from one conductor to another. The mechanism of a switch removes or restores the conducting path in a circuit when it is operated. It may be operated manually, for example, a light switch.

In our report, the electrical switches refer to the modular switches.

Legrand, Siemens, Simon and ABB captured the top four revenue share spots in the electrical switches market. Legrand dominated with 24 percent revenue share, followed by Simon with 9 percent revenue share and Siemens with 8 percent revenue share.

This report studies the global Electrical Switches production, demand, key manufacturers, and key regions.
