## Abstracts

According to our (Global Info Research) latest study, the global Electro-magnetic Brakes market size was valued at USD 697.8 million in 2023 and is forecast to a readjusted size of USD 859.6 million by 2030 with a CAGR of 3.0% during review period.

Electromagnetic brake is a mechanical part that stops or decelerates moving parts in a machine. Commonly known as brakes. The brake is mainly composed of a brake frame, brake parts and a control device. Some brakes are also equipped with an automatic adjustment of the brake clearance. In order to reduce the braking torque and structure size, the brake is usually installed on the high-speed shaft of the equipment, but large equipment with high safety requirements (such as mine hoists, elevators, etc.) should be installed on the low-speed shaft near the working part of the equipment on.

Global core electro-magnetic brakes manufactures include Altra Industrial Motion, Ogura Industrial, REACH Machinery etc. The top 3 companies hold a share about 45%. Asia-Pacific is the largest market, with a share about 44%, followed by Europe and North America with the share about 28% and 22%. In terms of product, power off brake is the largest segment, with a share over 90%. And in terms of application, the largest application is machinery, followed by material handling and packaging.
