## Abstracts

The global Electro-Mechanical Actuators market size is expected to reach \$ 1254 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

In 2025, global electro-mechanical actuator production reached approximately 376 k units, the average price is 2400 usd/unit. Electro-mechanical actuators use a motor as a driving source to convert electrical signals into mechanical operations.

Market Concentration and Key Players:

Internationally, the market concentration of electromechanical actuators is relatively high, mainly concentrated in developed countries such as Europe, America and Japan. For example, large manufacturers such as Shimadzu and Moog; from the domestic point of view, electromechanical actuators still have a lot of room for development.

Manufacturing Processes and Market Trends:

The core of the manufacturing process of electromechanical actuators lies in the development of precision machining and intelligent integration. Its manufacturing process involves the winding assembly of high-performance motors, the precision grinding of harmonic reducers or planetary roller screws, and increasingly adopts modular designs integrating sensors, drivers and control units.

The market trend shows a strong growth trend, which is mainly driven by stable demand in traditional fields such as industrial automation and explosive pull in emerging fields such as humanoid robots and new energy. Specifically, electric actuators have become the mainstream choice due to their high precision and digital interconnection advantages, especially in high power density scenarios such as robot joints, where the cost of actuators as core components can be as high as 40% to 60% of the whole machine. In the future, industry technology evolution will focus on intelligence, such as integrating Internet of Things and AI diagnostic functions to achieve predictive maintenance, and improving energy efficiency through the application of new materials,

while the acceleration of domestic substitution process will also profoundly affect the market competition pattern.
