## Abstracts

The global Electrolytic Tough Pitch Copper Materials (ETP) market size is expected to reach \$ 1523.7 million by 2029, rising at a market growth of 8.3% CAGR during the forecast period (2023-2029).

Electrolytic Tough Pitch Copper (ETP) is the most widely used of the coppers because of its combination of electrical and thermal conductivity, corrosion resistance, workability and aesthetic beauty. The superb corrosion resistance makes it a favored material for building applications and when exposed to weather for long periods, even centuries, this copper will develop a relatively impervious protective film which eventually becomes the familiar green patina of weathered copper.

This report studies the global Electrolytic Tough Pitch Copper Materials (ETP) production, demand, key manufacturers, and key regions.
