Abstracts

The global Electron Beam Generator market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Electron beam generators are where electrons are emitted from a tungsten cathode, accelerated by 60 to 175 kilovolts to a speed of light of approximately 2/3 of the speed of light and then focused on the workpiece as a high power intensity beam. Here, the electrons are slowed down and the beam energy is converted into heat.

This report studies the global Electron Beam Generator production, demand, key manufacturers, and key regions.
