Abstracts

The global Electronic Article Surveillance market size is expected to reach \$ 2117 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

Electronic article surveillance (EAS) is a technological method for preventing shoplifting from retail stores, pilferage of books from libraries or removal of properties from office buildings. Special tags are fixed to merchandise or books. These tags are removed or deactivated by the clerks when the item is properly bought or checked out. At the exits of the store, a detection system sounds an alarm or otherwise alerts the staff when it senses active tags. Some stores also have detection systems at the entrance to the restrooms that sound an alarm if someone tries to take unpaid merchandise with them into the restroom. For high-value goods that are to be manipulated by the patrons, wired alarm clips called spider wrap may be used instead of tags.

Currently, there are many producing companies in the world Electronic Article Surveillance (EAS) System industry, especially in North America and Europe. The main market players are Checkpoint Systems, Tyco Retail Solutions, Nedap, Hangzhou Century Co., Ltd, Gunnebo Gateway, WGSPI, Ketec, All Tag and Universal Surveillance Systems.
