## Abstracts

According to our (Global Info Research) latest study, the global Electronic Braking Systems (EBS) market size was valued at USD 786.8 million in 2023 and is forecast to a readjusted size of USD 2000.4 million by 2030 with a CAGR of 14.3% during review period.

Electronic braking system (EBS) is an automobile brake technology that automatically varies the amount of force applied to each of a vehicle's brakes, based on road conditions, speed, loading, etc. Always coupled with anti-lock braking systems, EBS can apply more or less braking pressure to each wheel in order to maximize stopping power whilst maintaining vehicular control. Typically, the front end carries the most weight and EBS distributes less braking pressure to the rear brakes so the rear brakes do not lock up and cause a skid.

WABCO, Knorr Bremse, Haldex are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry. The top 1 company hold a share about 60%. Europe is the largest market, with a share about 50%, followed by North America and Asia Pacific with the share about 20% and 18%.
