Abstracts

The global Electronic Expansion Valves (EEVs) market size is expected to reach \$ 4888 million by 2032, rising at a market growth of 19.8% CAGR during the forecast period (2026-2032).

Electronic Expansion Valves (EEVs) are mainly used in refrigeration, air conditioning and heat pump systems to realize automatic adjustment of refrigerant flow, so that the system can operate under the best conditions, and achieve rapid cooling or heating, precise temperature control and energy saving. The electronic expansion valve is composed of a controller, an actuator and a sensor. Since the temperature sensing part of the electronic expansion valve is a thermocouple or a thermal resistance, it can accurately reflect the change of heat at low temperatures and provide more accurate flow adjustment.

The major players in global Electronic Expansion Valves (EEVs) market include SANHUA, Fujikoki, DunAn, etc. The top 3 players occupy about 95% shares of the global market. China and Europe are main markets, they occupy about 80% of the global market. Electromagnetic EEVs is the main type, with a share about 90%. Home Inverter Air Conditioner is the main application, which holds a share about 90%.

This report studies the global Electronic Expansion Valves (EEVs) production, demand, key manufacturers, and key regions.
