Titanium Tetrachloride, also titanium tetrachloride, is the inorganic compound with the formula $TiCl_4$. It is a colorless liquid with a penetrating odor. Titanium tetrachloride does not exist naturally in the environment but is man-made using minerals that contain high levels of titanium.

Titanium tetrachloride ($TiCl_4$) is used mainly in the chemical industry as an intermediate in the production of titanium dioxide and titanium metal in the form of sponge or powders. $TiCl_4$ is also used in the manufacture of catalysts and as a glass and metal surface treatment. Because of its hazard potential, $TiCl_4$ is handled under strictly controlled conditions.

This report covers electronic grade titanium tetrachloride, i.e. products with a purity of more than 99.9%. Since titanium tetrachloride is an intermediate in the production process, this report provides statistics on the production side.
