According to our (Global Info Research) latest study, the global Electronic Manufacturing Services (EMS) market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Electronics manufacturing services (EMS) is a term used for companies that design, manufacture, test, distribute, and provide return/repair services for electronic components and assemblies for original equipment manufacturers (OEMs). The concept is also referred to as electronics contract manufacturing (ECM).

IT infrastructure, with data center or cloud computing services as the core, will constitute the biggest driving force. Server EMS is basically monopolized by the Taiwanese vendors, with a global market share of over 90%. Taiwan has a complete industrial chain of server, which is viewed as an extension of the computer. As the Taiwanese vendors have stronger and stronger technical ability, the future equipment cabinet solution of Server+Routing+Storage+Switching will gain more market space.
