Abstracts

Peltier modules contain two external ceramic plates separated by semiconductor pellets. One of the plates absorbs heat (becomes cooler) and the other plate dissipates heat (becomes hotter) when a current is passed through the semiconductor pellets. Refrigeration tablet can also be called as thermoelectric semiconductor refrigeration components, or Peltier and so on. As the refrigeration tablet is divided into two sides, one for endothermic side, while the other for radiating side, just playing the thermal role, not producing cold by itself, so it should be called as refrigeration tablet. As its wide application in Military, Medical, Daily Life, Lab Installations, Special Devices, we made this Refrigeration Tablet User Guide to help you harness DIY ability and broaden the horizons.
