## Abstracts

The global Electronic Potting & Encapsulating market size is expected to reach \$ 4380 million by 2032, rising at a market growth of 9.1% CAGR during the forecast period (2026-2032).

Electronic Potting and Encapsulation delivers a thicker and more robust solution versus conformal coating to protect electronic assemblies from harsher environments to keep them functioning properly for longer lengths of time, and/or to keep them protected from security threats. Electronic Potting and Encapsulation also create a barrier against moisture, dust, fungus and corrosion. These processes also enhance circuit reliability by eliminating leakage from high voltage circuits.

Henkel, Dow Corning and Hitachi Chemical are the top 3 players of Electronic Potting & Encapsulating, with about 50% market shares.
