According to our (Global Info Research) latest study, the global Electronic Prescribing market size was valued at USD 1575.8 million in 2023 and is forecast to a readjusted size of USD 2005.3 million by 2030 with a CAGR of 3.5% during review period.

E-prescribing or electronic prescribing is a process involving the electronic generation and sending of prescription orders for the convenience of medical practitioners or physicians, allowing them to transmit prescriptions directly from the point of care to a pharmacy. E-prescribing enhances the safety of patients and the quality of care, since there is no manual writing involved and thus there is less probability of prescription errors. In addition, e-prescribing also helps conduct security checks, encapsulate medical lists, and compile the complete historical data of a patient.

Major participants in the Global Electronic Prescription System are Surescripts, Henry Schein, Cerner Corporation, HealthFusion, Allscripts, Athenahealth, Bizmatics, eClinicalWorks and Medi-Her, among others.
