Abstracts

Image sensors held the largest share of the electronic sensors market for consumer industry owing to their huge demand in smartphones and digital cameras. However, the market for fingerprint sensors is expected to grow at the highest CAGR between 2017 and 2022 because of their growing adoption in a large number of electronic devices such as smartphones and laptops. These sensors are used to add another layer of security authentication for safe access of these devices. The rising mobile application ecosystem enables adoption of smartphones for ecommerce and financial transaction further makes fingerprint sensor as an essential requirement. Fingerprint sensors are also likely to be commercialized in computer peripherals such as mouse and keypad in the near future.
