## Abstracts

According to our (Global Info Research) latest study, the global Eletriptan Tablets market size was valued at US\$ 151 million in 2025 and is forecast to a readjusted size of US\$ 187 million by 2032 with a CAGR of 3.2% during review period.

Eletriptan Tablets are oral solid dosage forms containing eletriptan hydrobromide as the active ingredient. They belong to the second-generation triptan class and are mainly used for the acute treatment of migraine attacks with or without aura in adults. The mainstream commercial strengths are 20 mg and 40 mg, while 80 mg is available in a limited number of markets. On a finished-dose basis, the upstream supply chain mainly includes eletriptan hydrobromide API, oral solid-dose excipients such as lactose, microcrystalline cellulose, croscarmellose sodium, and magnesium stearate, as well as blister packaging materials, inserts, cartons, and formulation manufacturing services. Downstream customers mainly include originator and generic marketing authorization holders, hospital pharmacies, retail pharmacy chains, e-prescription fulfillment platforms, pharmaceutical wholesalers, and neurology or headache-care channels. Given that the product is already off-patent and the global market is primarily characterized by mature generic competition while still retaining certain specialty prescription-drug attributes, global nominal capacity of Eletriptan Tablets is estimated at about 82.4 million tablets in 2025, with actual sales volume of about 63.56 million tablets and an average ex-factory price of around US\$2.32 per tablet. Affected by API costs, formulation expenses, market access structure, regional pricing systems, and downstream bargaining power, the overall industry gross margin is typically estimated at 31%-45%.
