Abstracts

The global Elevating Parking Robot market size is expected to reach \$ 177 million by 2032, rising at a market growth of 18.8% CAGR during the forecast period (2026-2032).

Elevating Parking Robot is a vertical lifting-based automated parking system designed to enable vehicle storage and retrieval through vertical displacement mechanisms within structured parking environments. It integrates lifting structures, control systems, and sensing technologies to optimize vertical space utilization and improve parking efficiency in space-constrained urban facilities. Its advantages include high space utilization efficiency, reduced land footprint, improved operational throughput, and enhanced safety through controlled mechanical lifting operations. In 2025, the capacity utilization rate was about 70%, and the average gross margin was approximately 22%. Production in 2025 was 1700 units with an average price of 30000 USD per unit. The upstream segment includes servo motors, drive units, and controllers, with representative suppliers such as Siemens, Bosch, Mitsubishi Electric, Panasonic, Inovance Technology, and SANYO DENKI. The midstream segment focuses on structural system design, lifting mechanism engineering, control system integration, and parking automation system development. The downstream segment is primarily concentrated in public parking facilities and commercial parking operators, with representative customers including Prologis, Simon Property Group, Brookfield Properties, and China Resources Land.

The elevating parking robot refers to a type of robotic parking system (RPS) that uses vertical movement to park and retrieve vehicles. Unlike traditional ground-level parking systems, these robots are designed to optimize parking space by making use of both horizontal and vertical spaces within a parking structure. The idea is to allow vehicles to be parked in a more compact manner, typically in multi-story parking garages, thereby

maximizing the number of vehicles that can be stored in a limited area.
