Abstracts

The global Elevator Safety Monitoring System market size is expected to reach \$ 1306 million by 2032, rising at a market growth of 7.8% CAGR during the forecast period (2026-2032).

The elevator safety monitoring system is a digital system designed for regulatory authorities, property management companies, and maintenance enterprises. It utilizes the Internet of Things (IoT), big data, video/voice communication, and emergency response mechanisms to monitor and manage the entire lifecycle of elevator operations online and in a unified manner. Typically, it collects data from elevator control cabinets, car/shaft status, entrapment alarms, remote video/voice intercoms, maintenance records, and annual inspection information. This enables real-time monitoring of elevator operations within a city or industrial park, abnormal warnings, automatic dispatching of entrapment incidents, and emergency response scheduling. It also creates traceable safety files and risk maps. Furthermore, it integrates with the 12345 hotline, emergency centers, maintenance units, and property management platforms, making the entire process of 'anomaly detection—early warning push—dispatch and handling—feedback closed loop' online and transparent. This helps reduce accident rates and regulatory costs, upgrading the previously fragmented, reactive elevator safety management into a real-time, proactive, and fully traceable intelligent monitoring model.

This report studies the global Elevator Safety Monitoring System demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Elevator Safety Monitoring System, and provides market size (US\$ million) and Year-over-Year

(YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Elevator Safety Monitoring System that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Elevator Safety Monitoring System total market, 2021-2032, (USD Million)

Global Elevator Safety Monitoring System total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Elevator Safety Monitoring System total market, key domestic companies, and share, (USD Million)

Global Elevator Safety Monitoring System revenue by player, revenue and market share 2021-2026, (USD Million)

Global Elevator Safety Monitoring System total market by Type, CAGR, 2021-2032, (USD Million)

Global Elevator Safety Monitoring System total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Elevator Safety Monitoring System market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Otis Elevator, KONE, Schindler, ThyssenKrupp, Careston, Fujitec, Hitachi, Hyundai Elevator Co., Ltd., Toshiba Elevators, IBM, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Elevator Safety Monitoring System market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years

2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
