## Abstracts

According to our (Global Info Research) latest study, the global Embedded Controllers market size was valued at USD 5400.4 million in 2023 and is forecast to a readjusted size of USD 8773.1 million by 2030 with a CAGR of 7.2% during review period.

Embedded Controllers is a microcontroller in computers that handles various system tasks that the operating system does not handle.

According to SEMI, worldwide sales of semiconductor manufacturing equipment increased 5% from \$102 billion in 2021 to an all-time record of \$107.6 billion last year. The record high for semiconductor manufacturing equipment sales in 2022 stems from the industry drive to add the fab capacity required to support long-term growth and innovations in key end markets including high-performance computing and automotive. Global sales of wafer processing equipment rose 8% in 2022, while other front-end segment billings grew 11%. After robust growth in 2021, assembly and packaging equipment sales decreased 19% last year while total test equipment billings contracted 4% year over year.
