The global Embolization Particle market size is expected to reach \$ 7665 million by 2032, rising at a market growth of 14.2% CAGR during the forecast period (2026-2032).

Embolization Particle or embolisation refers to the passage and lodging of an embolus within the bloodstream. It may be pathological (in which sense it is also called embolism), for example a pulmonary embolism, or therapeutic, as a hemostatic treatment for bleeding or as a treatment for some types of cancer by deliberately blocking blood vessels to starve the tumor cells.

North America is the largest region of Embolization Particle, with a market share about 40%. It was followed by Europe with 30%. Sirtex Medical, Merit Medical, Cook Medical, BTG Medical and Boston Scientific Corporation are the top 5 manufacturers of industry, and they had about 80% combined market share.

This report studies the global Embolization Particle production, demand, key manufacturers, and key regions.
