According to our (Global Info Research) latest study, the global EMC Chamber & Anechoic Chambers market size was valued at US\$ 620 million in 2024 and is forecast to a readjusted size of USD 950 million by 2031 with a CAGR of 6.3% during review period.

EMC (Electromagnetic Compatibility) Chambers and Anechoic Chambers are specialized testing environments designed to assess the electromagnetic properties of electronic devices and systems. EMC Chambers are used to evaluate a device's ability to operate without emitting excessive electromagnetic interference (EMI) and to ensure it is not overly susceptible to external electromagnetic disturbances. Anechoic Chambers, often used in conjunction with EMC testing, are lined with absorbent materials to minimize reflections of electromagnetic waves, providing a controlled setting to accurately measure emissions and immunity. These chambers are essential in ensuring that electronic products comply with regulatory standards and perform reliably in real-world conditions without causing or experiencing interference.

High-performance absorbers (e.g., Emerson & Cuming's ferrite tiles and hybrid materials) are critical for minimizing reflections and improving test accuracy

Environmental compliance (REACH, RoHS) is prioritized in material production, aligning with global sustainability goals.

Manufacturers emphasize tailored solutions, requiring clients to specify chamber dimensions, power needs, and ventilation during procurement.

Modular designs (e.g., Holland Shielding's ANEC series) allow scalability for diverse testing environments, from small metrology labs to large automotive facilities.

Manufacturers are focusing on eco-friendly materials for RF absorbers and improved ventilation systems to reduce energy consumption. The use of digital twin technology for chamber design optimization is emerging.

Hybrid chambers that support both EMC and RF testing (e.g., 5G, antenna, and EMI testing) are gaining popularity. This reduces infrastructure costs and enhances testing efficiency.
