EMC (Electromagnetic Compatibility) Testing and Certification Services are professional third-party or accredited laboratory services that evaluate electronic and electrical products for electromagnetic emission and immunity compliance according to international and regional regulatory standards, providing laboratory testing, measurement validation, conformity assessment, certification approval, and global market access support to ensure products meet safety, performance, and regulatory requirements before commercialization.

The EMC testing and certification services industry chain begins upstream with manufacturers of testing equipment, shielding chambers, measurement instruments, and calibration tools that provide the technical infrastructure required for accurate electromagnetic evaluation, continues midstream with accredited laboratories, certification bodies, and third-party testing organizations that operate EMC facilities, conduct emission and immunity tests, and issue compliance reports, and extends downstream to electronics manufacturers, automotive companies, aerospace firms, medical device producers, and telecommunications equipment suppliers that rely on these services for regulatory approval, global market entry, product validation, and continuous compliance management across international standards and evolving regulatory frameworks.
