## **Abstracts**

According to our (Global Info Research) latest study, the global Emergency Batteries market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Emergency batteries are used to support DC powered avionics and lighting systems and should not be used unless the main power is interrupted (i.e. an emergency). Emergency batteries sometimes have built-in electronics that provide charge control, condition monitoring, and diagnostics. Major aircraft batteries are rated from about 10 to about 50 Ah, and they are usually designed for high discharge rates. Emergency batteries range in capacity from less than 1.0 Ah to about 10 Ah and are generally not designed for high discharge rates.
