The global Emollient market size is expected to reach \$ 1716 million by 2032, rising at a market growth of 2.4% CAGR during the forecast period (2026-2032).

Emollient is the medical word for a moisturizer. Emollients trap moisture in the skin and form a

Protective oily layer on the outer skin which helps skin repair and improves skin hydration. Emollients replace natural oils that help keep water in the skin to prevent it becoming dry, cracked, rough, scaly and itchy. Their use can prevent conditions like eczema 'flaring up'.

Global Emollient key players include BASF SE, Croda International Plc, Lubrizol Corporation, etc. Global top three manufacturers hold a share over 50%.

Europe is the largest market, with a share about 35%, followed by China, and North America, both have a share over 40 percent.

In terms of product, Synthetic is the largest segment, with a share over 75%. And in terms of application, the largest application is Skin Care, followed by Hair Care, Oral Care, etc.
