Emulsion Type Surface Sizing Agent is a chemical agent prepared by emulsion polymerization with water as the dispersion medium. It is mainly used for the surface treatment of paper, cardboard or textiles. Its core component is polymer emulsion (such as styrene acrylic acid, alkyl ketene dimer), which forms a uniform protective layer on the surface of the material through film-forming action, thereby improving water resistance, mechanical strength, printability and friction resistance. It has the characteristics of high environmental protection, good stability and strong permeability.
