## Abstracts

According to our (Global Info Research) latest study, the global Encapsulated Coils market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Made from conductive metal wire wrapped or coiled into a specific diameter, encapsulated coils, like all electric coils, are electromagnets or magnets that are only activated to magnetism when introduced to an electrical current. Besides, because encapsulated coils are coated in a resin that covers the wire, they are much more efficient at protecting wires against moisture and other types of damage.
