According to our (Global Info Research) latest study, the global End of Trip Facilities market size was valued at US\$ 8519 million in 2025 and is forecast to a readjusted size of US\$ 11984 million by 2032 with a CAGR of 5.0% during review period.

End of Trip (EOT) Facilities refer to the specialized amenities and infrastructure provided within commercial and residential buildings to support active commuters?particularly cyclists, runners, and walkers. These facilities are designed to bridge the 'last mile' between sustainable transportation methods and the workplace or home environment.

Several interconnected forces are driving the adoption and sophistication of EOT facilities globally:

According to industry experts, the boundaries between short-stay guests, long-stay residents, business travelers, and local community members are dissolving. Properties are evolving into integrated ecosystems where wellness, mobility, and convenience converge. EOT facilities are no longer an afterthought but a strategic amenity that serves multiple user groups simultaneously?office workers, hotel guests, residential tenants, and fitness-focused visitors.

The global shift toward health-conscious living and sustainable transportation has accelerated demand for end-of-trip infrastructure. As Marloes Knippenberg, CEO of Kerten Hospitality, notes: 'Community expectations will reach new levels with the ever-changing needs of our guests... requiring new approaches to master planning and operational structures'. Building owners and developers recognize that providing high-quality EOT amenities is no longer optional for attracting premium tenants and guests.

The industry is moving beyond sustainability toward regeneration?designing spaces that restore ecosystems and uplift communities. EOT facilities directly support this shift by enabling low-carbon commuting options (cycling, walking, public transport integration) and reducing building-level carbon footprints. As regulatory pressures mount globally, developers incorporating EOT infrastructure gain competitive advantages in leasing, valuations, and compliance.
