Endodontic instrumentation has advanced significantly in recent years with a range of powered rotary and reciprocating systems that can make root canal treatment easier to perform. Endodontic electric motors are a part of this advancement as they provide clinicians with the ability to use endodontic files with constant and precise torque suited to the canal being treated. Many of these systems offer programmable settings, automatic reverse functions designed to reduce file breakage, and some even feature integrated apex locators. Some electric dental handpiece systems can even be used for endodontics along with a full range of other functions.

The major players in global Endodontic Electric Motors market include Dentsply Sirona, Danaher, Morita, etc. The top 3 players occupy about 45% shares of the global market. North America and Asia-Pacific are main markets, they occupy about 60% of the global market. Corded is the main type, with a share about 80%.
