The global Endoscopic Cold Light Source market size is expected to reach \$ 2244 million by 2032, rising at a market growth of 7.9% CAGR during the forecast period (2026-2032).

Endoscope cold light source is the light source for looking inside and typically refers to looking inside the body for medical reasons using an endoscope, an instrument used to examine the interior of a hollow organ or cavity of the body. Unlike most other medical imaging techniques, endoscopes are inserted directly into the organ.

The major manufacturers of endoscopic cold-light source include Olympus, Karl Storz and Stryker, etc., with the top three accounting for about 35% of the entire market.

North America is the largest market with a market share of about 40%, followed by Europe with about 30%.
