Abstracts

The global Endoscopy Device market size is expected to reach \$ 11250 million by 2029, rising at a market growth of 5.6% CAGR during the forecast period (2023-2029).

Global key players of Endoscopy Device include Olympus, Karl Storz, Stryker and HOYA, etc. The top four manufacturers hold a share over 70%.

Europe is the largest market of Endoscopy Device, holds a share over 40%, followed by North America and Asia-Pacific.

The category with the largest proportion in the sales end is Rigid Endoscope, with a share over 85%, followed by Transportation and Logistics, BFSI and Healthcare.

An endoscope is an illuminated optical, typically slender and tubular instrument (a type of borescope) used to look deep into the body and used in procedures called an endoscopy. Endoscopes use tubes which are only a few millimeters thick to transfer illumination in one direction and high-resolution images in real time in the other direction, resulting in minimally invasive surgeries. They can be used to examine visually and diagnose, or assist in surgery such as an arthroscopy.
