Abstracts

Owing to the increasing use of smart grid services, growing competition among industrial enterprises, and supporting government policies and incentives associated with energy efficiency, the market is expected to witness considerable growth in the future. Currently, the world faces the problem of energy security and inefficient access to electricity because of which various initiatives are being taken to effectively manage the energy sources. Due to the increasing environmental concerns regarding extinction of conventional energy sources, it is necessary to shift toward the use of renewable energy sources. These concerns call for efficient energy management, which has prompted many countries to generate electricity through renewable sources. China emerged as the leader in the installed renewable energy capacity industry in 2016, with a combined capacity of 545.21 gigawatt. However, lack of skilled personnel challenges the market from growing exponentially.
