ENF-grade insect-proof board is a specially treated wood board with insect-proof and corrosion-resistant functions. ENF grade refers to boards with formaldehyde release $\leq 0.025\text{mg/m}^3$, which can effectively resist the attack of wood pests and extend the service life. This board is usually used in furniture, construction and packaging, especially in humid or high temperature environments, and can ensure long-term stable performance. Its excellent insect-proof performance makes it widely used in furniture manufacturing and home decoration.
