Abstracts

According to our (Global Info Research) latest study, the global Engagement Ring Insurance market size was valued at US\$ 1914 million in 2025 and is forecast to a readjusted size of US\$ 2781 million by 2032 with a CAGR of 5.3% during review period.

Engagement ring insurance refers to property risk protection services offered to individual consumers by insurance companies, professional jewelry insurers, MGAs, brokerage platforms, valuables insurance service providers, or jewelry retail partner insurance channels for engagement rings, wedding rings, diamond rings, and other high-value jewelry items.

From a product perspective, the industry is shifting from traditional 'home insurance with listed items' to 'independent jewelry insurance + online quotes + zero deductible + global coverage + jeweler-assisted claims processing.' Professional insurers emphasize features such as mystery smuggling, accidental damage, global travel coverage, the ability to return to the original jeweler for repair or replacement, and low or zero deductibles; large insurance groups rely on brand reputation, agency networks, and relationships with high-net-worth clients. Future competition will not only focus on premium prices, but also on underwriting speed, valuation processes, claims experience, jeweler networks, embedded sales, and digital underwriting capabilities. Due to the paramount importance of insurance regulation, insurer qualifications, and claims liability, simple traffic platforms cannot replace professional entities with underwriting capabilities or compliant brokerage qualifications.
