Abstracts

This report studies the Engine Control Modules market, Engine Control Modules, also commonly called an engine control unit (ECU), is a type of electronic control unit that controls a series of actuators on an internal combustion engine to ensure optimal engine performance. It does this by reading values from a multitude of sensors within the engine bay, interpreting the data using multidimensional performance maps (called lookup tables), and adjusting the engine actuators accordingly.

Scope of the Report

This report focuses on the Engine Control Modules in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, in the foreign industrial developed countries the Engine Control Modules industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the United States, Europe, Japan, etc. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, the manufacturing cost is competitive disadvantage, as the Chinese Engine Control Modules production enterprise technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase .

Chinese Engine Control Modules industry has developed into a national industry with certain research and production capacity, industry product mix has gradually improved, currently China has become international Engine Control Modules large consumption country, but the production technology is relatively laggard, currently can only produce some low-end product, although after 2012 the new production lines is increasing, the

technology is still relying on import.

With the rapid growth of the national economy as well as the rapid development of downstream industries, Chinese automotive market demand is exuberant, providing a good opportunity for the development of Engine Control Modules market and technology.

The worldwide market for Engine Control Modules is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
