According to our (Global Info Research) latest study, the global Engine-Driven Welders market size was valued at US\$ 504 million in 2024 and is forecast to a readjusted size of USD 665 million by 2031 with a CAGR of 4.1% during review period.

Engine Driven Welders incorporate a gasoline, diesel, or propane fueled engine coupled to an electrical generator to produce power for Stick, TIG, MIG and Flux-Cored welding. Engine driven welders are typically transported on a truck or trailer and are primarily used outdoors. The electricity generated by an engine driven welder powers fans, pumps, air compressors or other electrical tools commonly found on jobsites. During power outages, an engine driven welder can also be used as a backup generator.

Global Engine-Driven Welders key players include Lincoln Electric, Miller, Denyo, ESAB, etc. Global top four manufacturers hold a share about 55%.

Asia-Pacific is the largest market, with a share over 30%, followed by Europe, and North America, both have a share nearly 55 percent.

In terms of product, Gasoline Engine is the largest segment, with a share over 50%. And in terms of application, the largest application is Infrastructure, followed by Oil and Gas, Pipeline, Power Generation, etc.
